Installing the Lamps-Single Ended (Non-Shunted)

- Read all WARNING/CAUTIONS before continuing this section.
- Ensure fixture is 120-277V.
- Disconnect power at the source.
- Remove lens if applicable, remove cover and fluorescent tubes.
- Cut all wires that connect ballast. Properly discard ballast or cap off wires.
- Replace lamp holders at power end with supplied non-shunted lamp holders.
- Connect hot wire from power source into supplied non-shunted Lamp Holder "Hot In".
- Connect neutral wire from power source into supplied non-shunted Lamp Holder "Neutral In".
- If installing multiple lamps, continue reading. Otherwise skip to section 14.
- Connect separate hot wire into "Hot Out" from primary source lamp holder and connect that wire into "Hot In" on the adjacent tube.

- Connect separate neutral wire into "Neutral Out" from primary source lamp holder and connect that wire into "Neutral In" on the adjacent tube.
- Continue this process for additional lamps.
- Do not wire opposite end of lamp holder.
- Install lamp with the Turolight logo (driver side) into the wired end.
- Visibly affix "Modification Sticker" and reinstall housing cover and lens if applicable.
- Return power back to source and installation is now completed.

Note: The luminaire shall only mount max. 4 tubes.
