Tork Waste Bin

## **Tork Bath Tissue Jumbo Mini T2 System**

- High-capacity reduces cost-in-use
- Compact, space-saving design
- Stub roll feature for improved economy
- Environmentally friendly tissue options

455000A

## **Tork Liquid Soap S1 System**

- High-capacity and controlled dispensing reduces cost-in-use
- Non-antimicrobial soap refills

452000

## **Tork Xpress Hand Towel Interfold H2 System**

- One-at-a-time dispensing reduces cost-in-use
- Easy-top load and soft-open cover for quick maintenance
- Towel from two quality tiers, including environmentally friendly options

451000

## Tork Intuition® Hand Towel Roll H1 System

- One-at-time-dispensing reduces cost-in-use
- No touch, battery-operated hand-sensing system
- Controlled length of paper towel
- Towel from three quality tiers, including environmentally friendly options

# LEED for Existing Buildings: Operations and Maintenance

Tork dispensers and products can contribute toward earning LEED credits. Choose EcoLogo<sup>CM</sup> certified Tork products and controlled consumption dispensers for a more sustainable work environment.

## Materials & Resources

### Sustainable Purchasing: Ongoing Consumables (MR Credit 1.1 – 1.3)

- Purchases contain at least 10% post-consumer or 20% post-industrial material
- Purchases contain at least 50% materials harvested and processed or extracted and processed within 500 miles of project

Points: 1-3

With 100% recycled content and regionalized manufacturing facilities, many Tork products can contribute toward earning LEED points for this credit.

### Solid Waste Management: Ongoing Consumables (MR Credit 7.1 – 7.2)

- MR 7.1 (1 point) Reuse, recycle, or compost 50% of the ongoing consumables waste stream (by weight or volume)
- MR 7.2 (1 point) Reuse, recycle, or compost 70% of the ongoing consumables waste stream (by weight or volume)

Points: 1-2

Tork dispensing systems control consumption and waste at the source. Along with recyclable wrappers, cores and cases, Tork products can contribute toward earning points for this LEED credit by reducing solid waste.

## Indoor Environmental Quality

### Green Cleaning: High-Performance Cleaning Program (EQ Credit 3.1)

- Use of sustainable cleaning materials, products, equipment, janitorial paper products and trash bags

Points: 1

Using Tork recycled products along with sustainable cleaning chemicals can contribute toward earning LEED points for this credit.

### Green Cleaning: Purchase of Sustainable Cleaning Products and Materials (EQ Credit 3.4 – 3.6)

- Disposable janitorial paper products (Toilet Tissue and/or Hand Towels) that are Environmental Choice CCD-082 (EcoLogo<sup>CM</sup>)
- Hand soaps that do not contain antimicrobial agents

Points: 1-3

Tork EcoLogo<sup>CM</sup> certified hand towel, tissue and soap products may contribute toward earning LEED points.

## Innovations in Operations

### Innovation in Operations (Credit 1)

**Option A** - Achieve exemplary performance in an existing LEED for Existing O&M credit

**Option B** - Achieve significant, measurable environmental performance used in operations, maintenance or system upgrade strategy not addressed in the standard

- Credit 1.1 (1 point) specify A or B
- Credit 1.2 - 1.4 (1 point each) same as credit 1.1

Points: 1-4

SCA Tissue is committed to developing innovative Tork dispensing systems that reduce consumption, waste and cost while enhancing the overall quality of life.

### Documenting Sustainable Building Cost Impacts (Credit 3)

Document overall building costs for a period prior to the review and track changes in building operating costs and financial impacts of all aspects of the LEED for Existing Buildings: O&M implementation.

Points: 2

Tork dispensing systems and paper products can significantly reduce consumption and labor costs as well as overall cost-in-use.
